MARCH MEETING-GRANDINOTE AUDIO MACH 8XL FULL-RANGE CROSSOVERLESS LOUDSPEAKERS and SOLO INTEGRATED AMPLIFIER/DAC/STREAMER

We are very pleased to have Manuele Narduzzi, who recently found our group and is now a dealer for Grandinote Audio (www.grandinote.com) .

Grandinote made a very positive impression at the 2023 AXPONA and will be exhibiting again this year. Manuelle will be featuring a system with the following products:

**Grandinote Solo Integrated Amplifier with DAC and Streamer
(<https://www.grandinote.it/products/solo-integrated-amplifier?variant=46565032526155>)**

Grandinote Mach 8 XL Loudspeakers

(https://www.grandinote.it/products/grandinote_mach_8_xl_loudspeaker?variant=46481579114827)

Both products represent years of ongoing development with Magnetosolid technology combining new class A solid state components implemented with classic tube circuits and the loudspeaker using a line source array of drivers developed to work with a unique cone treatment and loading to allow full-range, highly efficient, crossoverless implementation.

Do review the website in detail for more information.

All music will be via streaming with Qobuz with Manuele also using some stored files. Members can bring music on memory stick to play as time allows.

Please RSVP to Manuele Narduzzi at manuele.narduzzi@gmail.com to get directions to the meeting.
