**JUNE MEETING-RAY MAZEIKA'S PLACE--DAVID  
JANSZEN PRESENTING THE  
Janszen Model zA2.1 Electrostatic Hybrid Loudspeaker**

Ray Mazeika is hosting the June meeting at his home in Plainfield. We are happy to welcome back David Janszen from Janszen Electrostatic Speakers ( <http://www.janszenloudspeaker.com/> ) who will present his latest Janszen Model zA2.1 hybrid loudspeaker, which played to favorable response at the recent AXPONA show as evidenced that it was often difficult to find an empty seat in the room! Please review the website for details about the design.

Ray will have the following components on hand:

Source: Oppo BDP-105. Running the latest firmware update.

Preamp (on Loan): McIntosh Labs C48

Amplification: McIntosh Labs MC452 Quad Balanced Power Amp [www.mcintoshlabs.com](http://www.mcintoshlabs.com)

In addition, David will be bringing a Decware 25watt/channel tube amp or 60watt mono blocks. [www.decware.com](http://www.decware.com)  
He will also have his Windows PC and exaSound e20 DAC. [www.exaSound.com](http://www.exaSound.com)

The exaSound is one of the most advanced current designs with 24/352 PCM as well as 1x, 2x, and 4x DSD capabilities and has received excellent reviews.

Do bring your favorite music (any format).

See you all Saturday at Ray's!
