**JUNE MEETING-PAUL MCGOWAN from PS AUDIO presenting the new
DIRECTSTREAM DAC with Oppo BDP-105 player, Audio Concepts
Sapphire XL Speakers, JL Fathom Subs, and N-Core Amp**

**We are very pleased to welcome back Paul McGowan from PS Audio
demonstrating their new Directstream DAC that converts all PCM CD
and file data to DSD with a simplified signal path. PS Audio says this
enables greater details and musicality to emerge especially from older
generation CDs often regarded as sonically compromised. There is an
abundance of information and videos on the PS Audio website detailing
the new Directstream DAC and it's unique technology:**

<http://www.psaudio.com/directstream-dac/>

**A big thanks to our member Mark Malboeuf who is supplying the following
associated equipment that sounded great at our February 2013 meeting:**

**Oppo BDP-105 (will be used as transport throughout and we will also listen to
the Oppo's DAC)**

N-Core Amplifier <http://www.hypex.nl/product/2012-11-23-13-41-35/nc400.html>

Audio Concepts Sapphire XL

Speakers <http://www.audioc.com/MAG/sapphirexl2.htm>

JL Fathom Subwoofers (yes 2!) <http://www.jlaudio.com/home-audio-powered-subwoofers-fathom>

**By all means, bring along your favorite music, either on CD or flash drive,
especially a musically worthwhile recording done back in the earlier days of
digital. Note that any music on flash drive (up to 24/192 ok) must be formatted
as one of the following: FAT, FAT32, NTFS**

**This should be a great meeting. Looking forward to meeting those we met at
AXPONA 2014 added to our list. See you all this Sunday!**
