

## MEETING NOTICE - Sunday, August 22nd, 2 PM - 5 PM

### AUGUST MEETING--COSMOS DESIGN (Bob Clanfield)--LATEST DEVELOPMENTS IN HIGH RESOLUTION COMPUTER AUDIO

Bob Clanfield gave a great presentation last August and is doing it again this August. There are many new interesting developments in the world of computer audio and we look forward to having Bob Clanfield with his experience as both a home integration and media consultant and of course, as an audiophile share his knowledge with us.

Bob Clanfield of COSMOS DESIGN ( [www.accessyourlifestyle.com](http://www.accessyourlifestyle.com) ) will be demonstrating the playback of:

- \*Higher resolution files of 96 & 176 to 192 kHz
- \*Hi-rez iTunes FLAC playback
- \*The benefits of firewire & iScsi!
- \*Why the ultimate interface cable may be the phone cable.
- \*iPad & iPhone remote control options
- \*Protecting & archiving your files
- \*The Model on display (Sonic Studio, Amarra, Mac)
- \*Bob will have attractive offers the day of the presentation.

#### The System

##### Digital Front-end:

Modified iMac & Mac Mini with touch panels.
