SEPTEMBER MEETING--DAN SCHMALLE (aka DOC BOTTLEHEAD) from THE TAPE PROJECT and JON VER HALEN from LOWTHER AMERICA

We have a unique opportunity to host Dan Schmalle (aka Doc Bottlehead) from The Tape Project (www.tapeproject.com). Dan is well known in audio circles for his great work with the Bottlehead (www.bottlehead.com) products and now The Tape Project. The Tape Project focuses on modifying select units for ultimate performance, producing their own tape head preamp (the Eros), and producing reference reel tapes of both the highest musical and technical quality. The resulting sound has been rated as both Best of Show and the best overall source by both reviewers and attendees at various audio shows.

Dan will be providing a modified Technics RS1500 Reel and an Eros Tape Head Preamp as the front end for the system.

Jon Ver Halen of Lowther America (www.lowther-america.com) has presented Lowther speakers and First Watt amplifiers for us at past meetings with great success. Jon will be demonstrating the new Lowther Field Coil drivers in the following system:

Lowther Field Coils in a BassZilla style enclosure (bass reflex low end)

Pass Labs Active Crossover

Bass Amp: Pass Labs XA30.5

Lowther Amp: Experience Music GM 70 or the First Watt J2

This should be a great event. See you all Sunday!
