**SEPTEMBER MEETING--JACK CALDWELL OF HOLISTIC AUDIO ARTS  
PRESENTING THE TIME-PULSE LAMBDA SYSTEM**

**We are pleased to welcome back Jack Caldwell of Holistic Arts who will present his new Time-Pulse Lambda System.**

( [http://www.holisticaudio.com/HolisticAudio/NEW%21 TimePulse\\_Lambda.html](http://www.holisticaudio.com/HolisticAudio/NEW%21 TimePulse_Lambda.html) )

**Jack presented his unique cylindrical, time-corrected systems to us nearly two years ago, with excellent results, and has now developed an open baffle, time-corrected speaker available as a nearly complete audio system for under \$2500! Just add a digital source-transport, player, or computer.**

**Here in Jack's own words is what he has planned for this Sunday:**

**The main item on the menu is the Holistic Audio Arts "entry-level" system. It is a highly integrated system solution which incorporates a novel hybrid passive filter + DSP optimizer solution to deliver astonishing performance. This is a blatant attempt to create state-of-the-art sonics but with a VERY down to earth pricing structure. And we think we have succeeded.**

**But don't just take our word for it:**

**We have showed it to several listeners with many years of expertise in the high-end audio scene, and the consensus is that this system can easily compare to and even surpass most \$50K+ systems.**

**We are extremely pleased to be able to offer the entire system for about 24X less than that!**

**(Yes, that's in the neighborhood of \$2,100 for the entire system, excluding interconnects, and \$1700 if you have a Mac you can use as music server.)**

**Our challenge: judge it for yourselves! Here's how:**

**In the next few days before we come to town, see if you can get one of your local high end dealers to show you their best "\$20K/ \$30K and \$50K systems". Take your favorite test disc and listen carefully.**

**Then, on Sunday, after listening to a few tunes from our favorites, we'll cue up a few of your favorites (Keep 'em short, please-about 3-4 minutes or so), and please let us know where you would rank us. We'll be very, very interested in your feedback and comments!**

**The system is comprised of the following elements:**

- Holistic Audio TimePulse Lambda speakers**
- Holistic Audio Timbre correction system and speaker/room EQ (installed on a Mac or on a modded Behringer DEQ2496**
- Holistic Audio integrated amp (prototype, or Dayton Audio DTA100a integrated amp)**
- DAC: Modded DEQ2496**

**We will bring our Holistic Audio interconnects and speaker cables, and our front end will be Amarra Junior running on a Macbook Pro with SSD for most tunes, and standard iTunes running on the Mac's optical drive for any CD's you bring.**

**Just for fun, we may also bring our "cheapo-mac" which is a Dell-based Hackintosh (runs Mac OS on a Dell netbook). It's pretty amazing how good this little baby is. If time permits, we may also do a brief comparison of our prototype amps vs a Crown XLS1000 so you can get a feel for different Class-D implementations.**

**Not included in the system pricing but possibly included in the demo:**

- Holistic Audio interconnects**
- Aneodio DAC1**
- Virtue Audio Sensation amp**

**So plan to bring your favorite CDs for what should be a very interesting meeting indeed!**

**See you all this Sunday!**
