SEPTEMBER MEETING-LISTENING TO NEW DEVELOPMENTS IN CHINESE HIFI -SATURDAY, SEPTEMBER 28, 2-5PM, MT PROSPECT (UNITEL TECHNOLOGIES)

Thanks to our members John Brunner and Dan Melson for bringing the components we will be listening to. Chinese HiFi has evolved over the years to the point where many more audiophiles are giving it a listen or curious about the capabilities. Many designs incorporate the latest chip amp technology from TI

and Infineon along with tubes. Prices in many cases have fallen below what would be considered sales tax (or less) on a mid-fi component! Sources for these products include Amazon, eBay, and AliExpress. An audiophile website that pays special attention to this from an audiophile perspective is Dr. John Cheaptubeaudio (<https://cheaptubeaudio.blogspot.com/>) .

The following components will be on hand:

Aiyima T9 Hybrid Integrated Amp/Pre/DAC

Reisong Single-ended Tube Integrated Amp

Muse TDA1543x4 DAC (used at June meeting)

Aiyima T5 Hybrid Integrated Amp w/Phono

Fosi V3 Amplifier

We will also have John Brunner's 120w/ch Moore Frankland Monoblock amplifiers and Steve Merryweather's Stonyette speakers-both were used to great effect at the June meeting.

Hope to see you all this SATURDAY.
