DECEMBER MEETING-Wisdom Audio Loudspeakers, Amps, and Subs, Trinnov Room Correction, Grandinote and Trinnov Sources

We are very pleased to meet again with Manuele Narduzzi of Namec (<https://www.namec-usa.com>), who will be demonstrating a system of

Wisdon Audio Sage series L75 Loudspeakers, Wisdom Audio SA3 DSP amplifiers, Wisdom SCS 2 subwoofers, and the Trinnov Altitude 16 preamp-processor. A Grandinote Volta Streamer/DAC will also be on hand.

The Wisdom L75 speakers operate as a line source from 40Hz-20kHz with a planar magnetic line source driver handling the upper 6 octaves. The Wisdom SCS-2 subwoofers supply the lowest octave from 20-40Hz. Two Wisdom SA3 DSP amplifiers with 3 channels each of 500w @ 4ohms will drive the system. The system will be fully calibrated using advanced manual calibration using Trinnov Optimizer with the Trinnov Altitude 16 preamp-processor (Namec LLC is fully certified by Trinnov as of Oct 2025 for advanced calibration of Stereo and Home Theater system). This meeting will demonstrate the capabilities of this technology with a 2-channel stereo music system.

For the meeting Manuele will be featuring a system with the following products:

- **Source:** Grandinote Volta (<https://www.grandinote.it/grandinote-volta>) or Trinnov Altitude 16 (it has a streamer/dac inside)
- **Pre-Pro:** Trinnov Altitude 16 (<https://www.trinnov.com/en/products/altitude-sup-16-sup/>)
- **Power Amp:** 2x Wisdom Audio SA3 DSP (<https://www.wisdomaudio.com/product/sa-3-dsp/>)
- **Loudspeakers:** Wisdom Audio Sage serie - L75 (<https://www.wisdomaudio.com/product/sage-series-l75/>)
- **Subwoofers:** 2x Wisdom Audio SCS 2 (<https://www.wisdomaudio.com/product/scs-2/>)
- **Cables:** KimberKable for power cords (Ascent series), XLR interconnect and speaker cable (Select Copper/Silver or Carbon series)

Please RSVP to Manuele Narduzzi at manuele.narduzzi@gmail.com to get directions to the meeting.
